

Latest Map of Oak Wilt Infections 2026

Oak wilt is creeping toward Western NY. Here is the latest map of Oak Wilt infections in the United States, filtered by county. This "EDDMapS" is managed by the University of Georgia Center for Invasive Species and Ecosystem.

 Reported oak wilt infections

Update: State DEC has recently expanded the existing quarantined districts in Ontario and Yates counties after additional oak wilt infections have been detected in several locations. Monitoring stations have been set up in Niagara Falls and Youngstown.

We also prevent and treat other tree diseases such as anthracnose, spotted lanternfly, needle cast, spongy moth, and others. We specialize in injection services that treat the entire tree, without any contamination or runoff. Your other plants and pets are completely safe. Visit us at SavingOaks.com for more info.
